

Design Services for the Relocation of Lower Lane

Garg Consulting Services, Inc.

To accommodate the large-scale commercial development of adjacent land, sections of Lower Lane and Willard Avenue were relocated. Garg Consulting Services, Inc. was able to complete the Design Engineering and Coordination Services for this Project under strict time constraints by utilizing several scheduling solutions:

- Early identification of critical issues.
- Critical path management or, more specifically, parallel path implementation of tasks related to permitting, public involvement, materials procurement and hazardous material screening.
- Proactive coordination with stakeholders, the Town, Connecticut DOT, DEP, and Utilities.

Other project aspects included:

- Project Management and coordination.
- Roadway design.
- Traffic signal design.
- Environmental permitting.
- Preparation of bid packages and procurement of traffic signal equipment.
- Hazardous materials screening and demolition plan for two (2) buildings.
- Utility coordination and water and sewer relocation.
- Survey and Rights-of-Way mapping.
- Public involvement.

Organization Name	Location	Project Duration			Dollar Amount	Prime/Sub-Consultant
		Contract Date	Start Date	Completion Date		
Town of Berlin	Berlin, CT				Project Cost	Prime
		2005	2005	2005	\$700,000
