

# Metro-North Station Enhancements and Construction Management Services

Garg Consulting  
Services, Inc.

The MTA Board has approved a \$91.5 Million design-build contract to make state-of-the-art enhancements to five (5) stations, setting the stage for similar improvements to other Metro-North stations in the future.

The general scope of the work includes new signage, platforms, energy efficient LED lighting, benches with USB chargers, station dashboards and totems to provide convenient access to information, and improvements to customer restrooms as well as Wi-Fi and cellular connectivity. Upgrades at White Plains include improved station entrances and new interior wall panels, floor tiles, ceiling tiles, and fixtures.

For the station enhancement project, the MTA worked to study and revise existing design guidelines for stations and facilities, bringing world class standards to Metro-North stations. These revised guidelines will establish a new look for Metro-North stations, influencing station design long after improvements to White Plains, Harlem-125th Street, Crestwood, Port Chester, and Riverdale are complete.

Safety is a top priority at the MTA and, as part of the station enhancement project, Metro-North upgraded its electrical and communications system, adding closed-circuit security cameras inside and outside the stations.

Metro-North issued a design-build contract to expedite the project. Design-build contracts call for a team of designers and contractors to be responsible for both designing and building an entire project to ensure that coordination is seamless, and that work is completed in the shortest possible time frame.

Organization Name	Location	Project Duration			Dollar Amount	Prime/Sub-Consultant
		Contract Date	Start Year	Completion Year		
MNRR	Statewide, NY	07/06/2016	2016	2019	\$91.5 Million	Sub-Consultant
