

Task Order Highway Bridge & Overhead Sign Structure

State Project Nos. 170-3413/3414/3415/3416

Garg Consulting Services, Inc.

Garg is performing routine and in-depth inspections of over one hundred and forty-eight (148) state bridges and inspections of over forty-eight (48) cantilever, full span, and structure-mounted overhead sign supports over various CT highways.

Major project tasks include:

- Planning, scheduling, and coordinating each bridge and overhead sign inspection with CTDOT, local and national agencies, and State and local Police.
- Structural inspections.
- Providing requisite traffic control and necessary access equipment (man lifts, snoopers, etc.) for inspections.
- Minor maintenance of overhead sign structures (tightening/replacement of nuts and bolts, installing plugs and pipe caps and adding sealant in joints).
- Preparation of inspection reports and maintenance recommendations according to State and Federal guidelines.
- Internal QA/QC review of all procedures and reports.
- Specialized non-destructive testing as needed.
- Completion of the NHI Safety Inspection of In-Service Bridges course by all key Garg inspection personnel.

Organization Name	Location	Project Duration			Dollar Amount	Prime/ Sub-Consultant
		Contract Date	Start Year	Completion Year	Project Cost	Sub-Consultant
CTDOT	Statewide, CT	09/29/16	2017	2021	\$112 Million	Sub-Consultant
